Type: ROUTINE INSPECTION
Date: 18-NOV-2025

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The temperature inside the refrigerator where the dog vaccines are stored is 54 degrees F according to the inspector's Kestrel. The label on the vaccines states they should be stored at 35-46 degrees F. Failure to store vaccines at the proper temperatures may affect their ability to protect the animals from serious and deadly diseases.

Each dealer must use appropriate methods to prevent, control, diagnose, and treat diseases and injuries. The licensee must ensure that all vaccines are stored at the proper temperatures at all times.

Correction date: End of business November 18, 2025

This inspection and exit interview were conducted with the facility representative.
