

## Inspection Report

Blaine Brown  
3101 SE Ferry Slip Rd  
Newport, OR 97365

Customer ID: **501846**  
Certificate: **92-C-0192**  
Site: 001  
Blaine Brown

Type: ROUTINE INSPECTION  
Date: 11-DEC-2025

### 3.150(a)

## **Facilities, general.**

Four flighted birds, one diamond dove, two silver beak finches and one orange cheek finch have escaped and are flying freely outside their primary enclosure. Thirty minutes later an additional number of finches escaped their enclosure. Housing facilities must employ security measures that contain all birds securely. Safely securing flighted birds prevents physical harm to the birds and prevents them from escaping outside the facility. Correct by providing safety measures to prevent the birds escaping. Correct by 29DEC2025.

**3.158(a)(1) Repeat**

### **Cleaning, sanitization, housekeeping, and pest control.**

There is an excessive amount of excreta in the pigeon group enclosure. The floor of the enclosure is primarily covered with pine shavings which have not been removed and replaced as often as necessary to prevent amassing waste. There is significant buildup of bird waste material on the floors, perches and enrichment items. Too much excreta and food waste in primary enclosures can soil the birds, increase disease hazards, and attract pests into the enclosure. Remove excreta and food waste from primary enclosures and from under and around primary enclosures as often as necessary to prevent excessive accumulation.

This inspection and exit interview were conducted with the facility representative.
