Conservation Inc

Type: RE-LICENSE INSPECTION

Date: 25-NOV-2025

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility has been using gentamicin ophthalmic drops with an expiration date of October 2023 to medicate the right eye of one of their adult male wolves. Expired medications may be ineffective and are more likely to have been contaminated and could potentially worsen the medical condition being treated. Medicines used to prevent or treat disease must be properly stored, labeled, and not expired in order for them to appropriately and effectively prevent, control, and/or treat diseases.

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An adult male wolf had a pink, approximately 0.3cm soft tissue mass, adjacent to the lateral canthus of the right eye. The facility reported the condition as a chronic issue that periodically gets aggravated, requiring treatment. The facility has been treating the eye with antibiotic ophthalmic drops for several days. In addition, an adult female wolf was observed to be mildly lame in one of her back legs, noted only during a few short sprints in the enclosure. The attending veterinarian had not been informed about either wolves' conditions. All animals should be observed on a daily basis, with any problems conveyed to the attending veterinarian in a timely manner. Failure to consult with a veterinarian and provide appropriate diagnostics and treatment can result in a poor outcome for animals. A mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian.

This is a 2nd Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 1 more inspection(s) or by 3 Jan 2026 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
