Type: ROUTINE INSPECTION

Date: 04-SEP-2025

---

### **2.40(a)(2)**

#### **Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

The facility did not follow their attending veterinarian's care plan for a 6-year old female cockatiel with a feather condition.

On March 15, 2025, "Bibi" was taken to the attending veterinarian for significant feather loss on the head and neck. The medical record prescribes husbandry changes to start, which the facility implemented. The medical record also directs the facility to arrange a recheck exam in 1 month and recommends several diagnostic tests (full bloodwork, viral testing, fecal testing, and x-rays) if the bird's feather condition didn't improve.

At the time of inspection (September 4, 2025, about 6 months later), the inspector observed that the bird was quiet and still had significant feather loss on the head and neck. A facility representative reported that the husbandry changes did not appear to improve the bird's feather condition. However, this was not conveyed to the attending veterinarian, and the facility did not arrange the recheck exam or diagnostic testing.

Failing to follow the veterinarian's discharge instructions for this animal is preventing the attending veterinarian from ensuring the provision of adequate veterinary care and ensuring this animal's good health.

Correct by arranging a recheck examination with the attending veterinarian for the bird and continuing to follow the attending veterinarian's recommendations. Exhibitors shall ensure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Correction date: September 12, 2025.

This inspection and exit interview were conducted with a facility representative.
