The Lambs Farm Inc

Type: ROUTINE INSPECTION
Date: 16-DEC-2025

3.153(c)

Primary enclosures.

The facility's two primary enclosures housing waterfowl do not contain adequate aquatic areas. The inspector observed a water bowl but no pool in one enclosure housing three ducks. A second enclosure housing the rest of the waterfowl (15 ducks, 9 geese, and one swan) contained one shallow wading pool. The inspector observed one bird in the pool surrounded by 3-5 birds who were vocalizing and behaving aggressively towards the bird in the pool. One of the aggressive birds replaced the bird that was bathing. The facility stated these are temporary primary enclosures meant to house the animals for approximately 8 months while their permanent enclosures are renovated.

Lack of appropriate aquatic areas can lead to injuries from aggression, and can affect the birds' overall physical and behavioral health.

Correct by: Providing an aquatic area and a dry area that allows easy ingress and egress. Pools must be of sufficient surface area and depth to allow each bird to make normal postural and social adjustments, such as immersion, bathing, swimming, and foraging, with freedom to escape from aggression demonstrated by other birds in the enclosure. Dry areas must be of sufficient size to allow each bird to make normal postural and social adjustments with adequate freedom of movement and freedom to escape from aggression demonstrated by other birds in the enclosure.

Correction Date: December 31, 2025.

This inspection and exit interview were conducted with a facility representative.
