Site: 001

BECKY & LEONARD GOODMAN

Type: FOCUSED INSPECTION

Date: 10-DEC-2025

3.1(a)	Critical	Repeat
--------	----------	--------

Housing facilities, general.

- A puppy that had been present on the inspection conducted on 4 December 2025 was no longer at the facility. The licensee was unclear on what happened to this puppy and simply stated that it had disappeared and she was not sure exactly how. Facilities must securely contain all dogs, and must restrict other animals from entering. It is impossible to know exactly what happened to this puppy, but the facility clearly failed to keep it secure. The facility must ensure that all dogs are safely contained.

3.10(a)	Direct	Repeat
---------	--------	--------

Watering

In the indoor portion of the kennel, 7 water bowls (affecting 22 adults) were contaminated with roaches. These bowls were the only source of water available to the dogs. Water filled with dead/dying roaches cannot be considered safe to drink and is a source of contamination to the dogs. All dogs must have potable water continuously available unless restricted by the attending veterinarian. The licensee must ensure that clean potable water is available to the dogs at all times.

This inspection and exit interview were conducted with licensee.
