PO Box 1544  
Laporte, CO 80535

Customer ID: 8288

Certificate: 84-C-0071

Site: 004

W.O.L.F.

Type: ROUTINE INSPECTION

Date: 02-DEC-2025

### 2.40(b)(2)

Repeat

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There is an expired bottle of Carbocaine-V located in the safe that expired on 8/2025. It is stored in the safe with other drugs currently being used. The use of expired medication is not considered to be a safe or appropriate method to prevent, control, diagnose, and treat diseases and injuries since the expected results cannot be guaranteed. The facility must ensure the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. The licensee must ensure all medications on-hand are not expired. Corrected at time of inspection on December 2, 2025, by throwing medication away.

### 3.1(c)(1)(i)

Repeat

#### Housing facilities, general.

The housing facilities of the wolf-hybrids still contain several metal guillotine gates that are entirely rusted. These gates allow the staff to move the wolf-hybrids into a secure pen or shift to a different enclosure. Rust can cause weakness in the structural strength of the metal gates. Also, rust cannot be properly cleaned and sanitized. Surfaces that cannot be cleaned and sanitized could cause infection if bacteria or viruses are harbored in the material. Any surfaces that come in contact with the wolf-hybrids must be free of excessive rust that prevents the required cleaning and sanitization, or that affects the structural strength of the surface. To be corrected by March 2, 2026.

### 3.13(b)(2)

#### Veterinary care for dogs.

On September 3rd, 2025, the female wolf-hybrid "Ashima" was reported to have diarrhea, vomiting, bloating, and lethargy. The medical records do not have the problem identified, date and description of the problem, exam findings, or plan for treatment and care. The records only contain a fecal exam showing a positive result for tapeworms and treatment with Credelio Quattro. Correct and updated medical records allow the AV to monitor and effectively treat medical problems in wolf-hybrids and allows all caretakers to follow plans for treatments and care. The registrant must ensure that when a problem is identified (such as a disease, injury, or illness), the date and description of the problem, examination findings, test results, plan for treatment and care, and treatment procedures performed are documented in the medical record and available at time of inspection. To be corrected by December 15, 2025.
