

Inspection Report

Michael Raber
8399 County Road 235
Fredericksburg, OH 44627

Customer ID: **6012549**
Certificate: **31-A-0927**
Site: 001
Michael Raber

Type: ROUTINE INSPECTION
Date: 29-SEP-2025

3.4(c)

Outdoor housing facilities.

Outdoor enclosures contain surfaces that are not impervious to moisture:

• An outdoor enclosure housing 4 Havapoo puppies and 3 Cavapoo puppies has a wood shelter structure that is not impervious to moisture. During the inspection, the facility moved the puppies to a compliant enclosure.

• An outdoor enclosure housing 4 adult Boxers contains fence posts and a shelter structure made of wood that is not impervious to moisture

Surfaces in contact with the animals that are not impervious to moisture can absorb moisture and harbor bacteria while being unable to be properly cleaned and sanitized possibly exposing the animals to disease hazards. Building surfaces in contact with animals in outdoor housing facilities must be impervious to moisture. Correct by ensuring that all surfaces of outdoor housing facilities- including houses, dens, etc. – are impervious to moisture and surfaces that cannot be readily cleaned and sanitized are replaced when worn or soiled. Correct by 21-OCTOBER-2025.

3.6(a)(2)(i)

Primary enclosures.

An enclosure housing 4 Havapoo puppies and 3 Cavapoo puppies had sharp points. The sharp points consisted of several rows of barbed wire adjacent to the wall of the enclosure that are accessible to the animals. Failure to maintain enclosures without accessible sharp points can result in injury to the animals. Correct by ensuring that primary enclosures are constructed and maintained so that they have no sharp points or edges that could injure the animals. During the inspection, the facility moved the puppies to a compliant enclosure. Correct by 7-OCTOBER-2025.

This inspection and exit interview were conducted with the Licensee.
