Type: ROUTINE INSPECTION
Date: 30-DEC-2025

3.13(a)(3)

Veterinary care for dogs.

The facility is not following the program of veterinary care for vaccinations. The Program of Veterinary Care currently prescribes dogs will be vaccinated for DAPP and Leptospirosis (7-way vaccine) annually.

2 adult dogs are not up to date on their Distemper, Parvo, or Leptospirosis vaccines:

- Pelicity #48023 last administered on 26 June 2024
- Rhonda #41146 last administered on 26 June 2024

The facility representative stated that both dogs were pregnant when the vaccines were due so he was unable to vaccinate them at that time. He was not able to determine if the two dogs received the vaccine after the puppies were weaned.

Failure to follow the preventative care schedule for vaccinations in the Program of Veterinary Care does not ensure the dogs are receiving appropriate protection against contagious and deadly diseases such as distemper, parvo, leptospirosis, and rabies which can lead to illness and discomfort to the dogs. The facility must follow the vaccination schedule approved by the attending veterinarian in the Program of Veterinary Care to protect the dogs from deadly or contagious diseases.

Correct by 14 January 2026

This inspection and exit interview were conducted with the facility representative.
