Customer ID: **40223**  
Certificate: **43-A-5486**  
Site: 001  
KEVIN STREET

Type: ROUTINE INSPECTION  
Date: 22-JAN-2026

---

### **2.50(a)(2)**

#### **Time and method of identification.**

There were 30 weaned puppies in enclosures containing mixed litters, 10 of which did not have any individual identification, such as a tag, tattoo/microchip or collar.

Appropriate identification of dogs is necessary to ensure that each animal's identity can be known with certainty and to meet recordkeeping requirements for inventory, disposition, transport, and healthcare documentation. The facility must properly identify all dogs, including puppies, with an acceptable form of identification as specified in this subpart.

Correct by February 6, 2026.

### **3.13(b)(3)**

#### **Veterinary care for dogs.**

A 6-month-old female dog (ID-900263001200302) at the facility had a medical record on file, however the record had no information or records. The program of veterinary care (PVC) states that all puppies will be given a Parvo/Distemper vaccination at 6 and 8 weeks. The owner stated that the vaccinees had been given but that no record was available. Failure to document the vaccination of animals makes it difficult to know if they were given and to evaluate if they are receiving adequate veterinary care. The licensee must keep and maintain medical records that include the names of all vaccines and treatments administered, and the dates of administration.

Correct by February 6, 2026.

This inspection and exit interview were conducted with the licensee.
