Type: ROUTINE INSPECTION  
Date: 18-NOV-2025

---

### **3.153(a)(1)(ix)**

#### **Primary enclosures.**

A wooden feeding platform in the enclosure for "Horus", an adult Peregrine Falcon, had green organic buildup visible along the long edge. Wooden surfaces that have developed an algae-like film are not able to be effectively cleaned and sanitized. Failure to maintain surfaces that are suitable for cleaning and sanitization can increase the risk of exposing the birds to disease and organisms that can be harmful to their health and well-being. Primary enclosures must be constructed and maintained so that all surfaces in contact with the birds may be readily cleaned and/or sanitized in accordance with 3.158 or be replaced when worn or soiled.

Correct by 19 December 2025.

This inspection and exit interview were conducted with the facility representatives.
