3.1(c)(2)

HOUSING FACILITIES, GENERAL.

All surfaces must be maintained on a regular basis. At least two resting boards and one whelping box are chewed leaving rough wood. These areas cannot be cleaned and sanitized properly. Surfaces that cannot be cleaned and sanitized adequately can allow disease hazards to affect the good health of dogs. The breeder must repair or replace these areas. Also, the breeder needs to put into place a good maintenance program that addresses these areas before they become an NCI (non-compliant issue). Correct by 01-06-2017

This inspection and exit briefing were conducted with the owner and Karl Thornton, ACI.
