Type: FOCUSED INSPECTION

Date: 21-APR-2021

#### 2.131(c)(1)

#### Handling of animals.

The two stand-alone rabbit enclosures outside of the barn do not have a barrier fence to prevent the public from having direct contact with the rabbits. During exhibition, a barrier fence helps to protect the animals from harm and the public from injury. A barrier fence must be constructed of sufficient distance from the primary enclosures and in a manner that will assure the safety of the rabbits and the general viewing public. Correct by May 10, 2021.

This inspection and exit interview were conducted with the facility representative.
