**ROUTINE INSPECTION** Type:

Date: 28-DEC-2016

#### 3.1(c)(3)

#### HOUSING FACILITIES, GENERAL.

\*\*\*The outdoor housing facility had gravel floors with excessive amount of fecal build-up. The licensee stated he has not been spot cleaning the gravel in the enclosures. A build up of feces is a disease hazard and can attract pest. The licensee must ensure all surfaces which come in contact with the dogs are spot cleaned daily. Contaminated material must be replaced whenever this raking and spot-cleaning is not sufficient to prevent or eliminate odors, insects, pests, or vermin infestation.

To be corrected by: December 30, 2016.

#### 3.4(b)(3)

#### **OUTDOOR HOUSING FACILITIES.**

\*\*\* The 2 outdoor enclosures housing a total of 10 dogs which had 6 shelters that did not have wind/rain breaks at the entrance. Since it's a open, straight entrance into the shelters, with no flaps or doors, the dogs are not adequately protected from the elements. The dogs need effective wind and rain breaks on their outdoor shelter units to protect them from the elements and help keep them dry. The licensee must provide adequate wind and rain breaks at the entrances of all the outdoor shelter units.

To be corrected by: December 30, 2016.

This inspection and exit interview were conducted with the licensee.
