Inspection Report

Fresno's Chaffees Zoo Corporation

894 W. Belmont Ave. Fresno, CA 93728

Customer ID: 35137

Certificate: 93-C-0752

Site: 001

Fresno's Chaffee Zoo Corporation

Type: ROUTINE INSPECTION

Date: 11-JUN-2024

2.131(c)(1) Critical

Handling of animals.

2.131(c)(1) Critical

While performing in the morning bird show, the Harris's Hawk diverted from his typical flight path for the exhibition. He was observed flying around and landing in multiple trees above the facility and the surrounding area for several hours but failed to return to facility personnel despite multiple attempts to recall the hawk. The hawk was observed interacting with native, wild Red Tail Hawks the same afternoon before facility staff lost sight of him. Despite continued attempts to find and recapture the Harris's Hawk, in accordance with their standard operating procedures for escaped animals, he has not been observed in the area since the date of disappearance. Failure to recapture the animal may result in harm or death to the animal. During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

Correct by 12 June 2024

3.75(c)(1)(i)

Housing facilities, general.

Noticeable rust was observed along the metal baseboard/ resting surfaces support located on the indoor portion of all three colobus enclosures. Excessive rust observed on wire mesh containing the heater inside the Red ruffed lemur enclosure. Rusty surfaces cannot be effectively cleaned and sanitized. Any surfaces that come in contact with nonhuman primates must be free of excessive rust that prevents the required cleaning and sanitization, or that affects the structural strength of the surface.

Corrected at the time of inspection, 12 June 2024.

This inspection and exit interview were conducted with facility staff.
