Type: ROUTINE INSPECTION

Date: 21-MAR-2023

#### 3.127(c)

#### Facilities, outdoor.

- -There are 7 Herford cows in an enclosure that have to walk through thick mud, 5-7" thick, to access their water.
- -There are 14 goats in an enclosure on the west side of the facility that have to walk through water 2-3" in depth to go between their food and water, and their shelter.

A suitable method shall be provided to rapidly eliminate excess water so that all animals have clean, dry access to food, water, and shelter.

Ensure that there is a way to eliminate standing water, and water that causes thick mud from all primary enclosures.

To be corrected by March 23, 2023

This inspection and exit interview were conducted with the licensee.
