SOCIETY

Type: ROUTINE INSPECTION

Date: 28-FEB-2024

### 2.40(a)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There is no documentation of regularly scheduled visits of the attending veterinarian (AV) to the site premises. The facility representative could not recall the last time the AV was on site. The facility's written program of veterinary care (PVC) denotes site visits by the AV will occur annually. Consistent, regularly scheduled visits by the veterinarian provides a measure of quality assurance and helps sustain satisfactory oversight and communication between the AV and the facility. The facility shall employ an AV under formal arrangements. In the case of a part-time AV or consultant arrangements, the formal arrangements shall include a written PVC and regularly scheduled visits to the premises of the licensee.

Correct by 29 March 2024.

#### 2.40(a)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The written program of veterinary care (PVC) states that the frequency of sampling and treatment for ectoparasites and intestinal parasites is annual for wild and exotic animals. The only records for parasite testing and treatment of any animals include the 2 capybara "Spud" and "Tater Tot" that had fecal testing done over a year ago on 10/12/2022 with negative findings as well as application of a topical antiparasitic drug to the kinkajou "Kuzco" within the past year on 6/19/23. Failure to follow the parasite control program as directed in the PVC impedes the authority of the attending veterinarian to ensure adequate veterinary care of animals. Each exhibitor shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care by adhering to protocols in the written PVC.

Correct by 29 March 2024.

#### 2.134(b)

### Contingency planning.

The facility's contingency plan is dated 11/27/2022. An annual review has not been documented since that time. Failure to annually review the contingency plan for the humane care of animals during emergencies may result in the plan becoming out of date or obsolete. Each licensee must maintain documentation of their annual reviews, including documenting any
