Inspection Report

Texas A & M University-Kingsville M S C 201, 700 University Blvd KINGSVILLE. TX 78363 Customer ID: 1497

Certificate: 74-R-0094

Site: 001

Texas A & M University-Kingsville

Type: ROUTINE INSPECTION

Date: 10-DEC-2024

2.31(d)(1)(ii)

Institutional Animal Care and Use Committee (IACUC).

At the time of inspection, "The influence of co-cultured leptin and FGF2 on adipocyte regulated angiogenesis" protocol did not include a search for alternatives. The principal investigator must consider alternatives to the procedures that may cause more than momentary or slight pain or distress to the animals. The protocol must be amended to include a written narrative description of the methods and sources used to determine that alternatives were not available.

CORRECTION DATE: Corrected on 19 DEC 2024

2.31(e)(3)

Institutional Animal Care and Use Committee (IACUC).

The "Veterinary Technology Teaching Protocol" did not include a complete description for all proposed procedures that use animals. Failure to provide a clear and complete description of all animal use prevents the IACUC and USDA from ensuring that the protocol meets all regulatory requirements intended to ensure the welfare of the animals. All proposals to conduct activities involving animals covered by the Animal Welfare Act must contain a complete description of the proposed use of the animals. The animal use proposal must then be reviewed and approved by the IACUC to ensure all regulatory requirements regarding animal use and animal use proposals are met.

CORRECTION DATE: To be corrected from this day (19 DEC 2024) forward

3.125(a)

Facilities, general.

At the time of inspection, the outdoor enclosure at the farm for the goats had sharp points in the wire fencing. This could cause injury to the animals in the enclosure. The outdoor housing facilities must be structurally sound and maintained in good repair to protect the animals from injury. The facility must repair the fencing to prevent injury.

CORRECTION DATE: Corrected on 19 DEC 2024
