## **Inspection Report**

Toledo Zoological Society

P.O. Box 140130 Toledo, OH 43614 Customer ID: 2151

> Certificate: 31-C-0002

> > Site: 001 TOLEDO ZOO

Type: ROUTINE INSPECTION

Date: 13-SEP-2016

#### 3.101(b)

#### **FACILITIES, GENERAL.**

This facility lacks back up electrical power for the marine mammal housing building. In addition to this, Two large standing fans and one small window fan are the only cooling system for the three dens at night. This is not enough to cool this area during times of extreme temperature conditions. The polar bears are placed in their dens at 18:00 hours and let out at 0:730 hours for a total lock down time of thirteen and a half hours every night. There was no generator to turn on the fans during the two power outages that the zoo reported in August 2016. Temperatures in Ohio at this time were still in the high 70's to 80 degrees at night. Extremely hot warm temperatures without adequate cooling could greatly affect the health and comfort of the three adult and one juvenile polar bear locked inside for thirteen and a half hours. The facility must provide adequate fans and a backup generator for the hot weather and-or power outages.

Correct by 9-20-2016

The exit interview was conducted with the Director of Animal Programs.

(The inspection was conducted on 9-13 and 9-14-2016 and the exit interview was conducted on 9-15-2016).
