Sanitation.

The hedgehog enclosure located in the reptile house had many small cockroaches crawling throughout, on the floor, on the nest box and on the food in the feeding bowl. The cockroaches appeared to be entering from a small gap at the rear of the enclosure. The presence of pests, such as cockroaches, can lead to health hazards for the animals. The pests can also contaminate food, water, and living areas. A safe and effective program for the control of insects, ectoparasites, avian and mammalian pests must be established and maintained.

This is a 1st Relicense Inspection for a Class "C" license. The inspection and exit briefing were conducted with the Applicant.

All items must be in compliance within 2 more inspections or by 11/07/2021 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Relicense Inspection.

Regulated activity can continue under your existing USDA license until it expires.
