Inspection Report

ABNER B ZOOK 2207 Spangler Road SEVEN VALLEYS, PA 17360 Customer ID: 503995

Certificate: 23-A-0675

Site: 002

ABNER B ZOOK

Type: ROUTINE INSPECTION

Date: 26-OCT-2021

3.31(a)(1)

Sanitation.

There is a buildup of brown roughened scale and debris on the solid portion of the sides and floors of enclosures. The buildup of organic material such as this makes disinfectants ineffective. Inadequate cleaning and sanitization exposes the guinea pigs to potential disease hazards such as bacterial, fungal, and viral diseases. Correct by ensuring that enclosures are cleaned often enough to prevent a buildup pf organic material. In addition, enclosures must be sanitized at least once every 2 weeks. Correct by October 28, 2021.

3.31(b)

Sanitation.

Housekeeping. There were accumulations of dust, dirt, debris, fly dirt, and cobwebs on the walls, ceiling, racks, automatic water drainpipes, and enclosure surfaces. Animal facilities must be kept clean to ensure good quality of the air for the animals and to prevent unnecessary disease risks. Ineffective cleaning exposes the animals to disease hazards and health problems. Correct by ensuring the premises are kept clean, including: removing accumulations of dust, dirt, debris, fly dirt, and cobwebs from surfaces; routinely dusting off and sanitizing all surfaces on the inside of the facility; and maintaining a level of general cleanliness to support good animals husbandry and health. Correct by October 30, 2021.

This inspection and exit interview were conducted with the licensee.
