Inspection Report

Keepers Of The Wild Inc.

13441 E. Hwy. 66

Valentine, AZ 86437

Customer ID: 3460

Certificate: 86-C-0076

Site: 002

KEEPERS OF THE WILD, INC.

Type: ROUTINE INSPECTION

Date: 16-NOV-2017

3.75(c)(2)

HOUSING FACILITIES, GENERAL.

In the baboon and bonnet macaque exhibit, there were swinging ropes that were frayed in many areas. Fixtures in the enclosures should be removed or replaced when worn in order to protect animals from injury. A system of timely identification, facility repair, and maintenance must be in place.

Date to be Corrected: November 20, 2017

3.125(a)

FACILITIES, GENERAL.

***In one of the tiger's night enclosures, the step box of the wood climbing structure was worn and created sharp exposed edges and had a nail sticking up. The sharp edges and exposed nail could come into contact with the animal and cause injury.

***The wire mesh material (used to prevent digging and escape) in a coyote enclosure, housing two coyotes, was exposed in several areas. The exposed mesh poses a risk of injury to the animal such as by abrading the foot pads or entrapment and fracture of the legs.

***The two houses in the wallaby and muntjac enclosure had light fixtures with exposed light bulbs that were not covered. The exposed light bulbs poses a risk of injury to the animals if it breaks and glass gets into the enclosure of these animals.

***The doorway of the house for the muntjacs was in disrepair and worn away on one side, exposing wood and the mesh lining. Chewing and ingesting this material is a health risk and can cause injury to the animal.

Failure to maintain housing facilities in a structurally sound manner can cause injury to the animals. A system of monitoring and maintenance should be in place so that all housing facilities remain structurally sound and in good repair to protect the animals from injury.
