ROUTINE INSPECTION Type:

Date: 27-JAN-2020

3.31(c)

SANITATION.

Pest Control. There are numerous rodent droppings on a shelf by the front door containing tubes of caulk and miscellaneous items. A mouse trap was present on the shelf, but it was not in use. Lack of a pest control program can expose the guinea pigs to disease hazards and health problems. Licensee must establish and maintain an effective program for the control of mammalian pests such as mice to protect the health of the guinea pigs. Correct by February 1, 2020.

This inspection and exit interview were conducted with the owner.
