3.131(d)

Sanitation.

In the dry-food cooler there was a pallet containing several bags of Mazuri macropod pellets that had some loose pellets and several rodent droppings. Several of the outer bags had been chewed, there were many pieces of the chewed paper, and the rodent droppings were scattered in the areas between the bags, the present bags had not been chewed opened. Not maintaining an adequate pest program puts the animals at risk of disease transmission by rodents. The regulations state that a safe and effective program for the control of mammalian pests shall be established and maintained. Correct by: 04/12/2024

This inspection and exit interview were conducted with Facility Representative.
