Inspection Report

Montgomery Zoo
P.O. Box 3313

Montgomery, AL 36109

Customer ID: 3025

Certificate: 64-C-0003

Site: 001

Montgomery Zoo

Type: ROUTINE INSPECTION

Date: 01-AUG-2024

3.125(a) Repeat

Facilities, general.

The facility failed to maintain housing facilities in good repair.

- A portion of the shifting shoot for two tigers contained areas of thick flaking black paint and rust.
- Netting was installed over the cheetah exhibit to catch falling items from a gondola ride over the enclosure after an incident in 2022 resulted in the death of an adult male cheetah ("Santiago"). However, an approximately five foot in length gap is present between the outer wall of the enclosure and the end of the netting, leaving a gap that allows access into the area that houses the animals.

Failure to maintain housing facilities in good repair can affect the structural integrity of the enclosure which may lead to injury or harm of the animal. Housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

3.131(d)

Sanitation.

An insect infestation was located in multiple enclosures and food storage areas throughout the facility.

- Lines of ants were observed trailing into two enclosed stalls that housed giant anteaters. A cockroach was also observed in the drain outside the enclosures.
- In the education building, enclosures that contained a military macaw, a white fronted amazon and a kookaburra contained lines of ants in the cage bottoms, on perches and on food.
- The A6 Barn (Asia/Africa Forest) contained trails of ants that were observed along walls that houses a male bongo.
- In the A8 Barn (North America) a barrel that contained pelleted herbivore food harbored ants.

Insect pests can cause contamination and disease as well as discomfort to the animals. The facility must establish and maintain a safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests. Correct by maintaining an effective program by August 9, 2024.
