Inspection Report

Branson's Promised Land Zoo 2751 Shepherd of the Hills Expressway Branson, MO 65616 Customer ID: 329566

Certificate: 43-C-0352

Site: 001

PROMISED LAND ZOO

BRANSON

Type: ROUTINE INSPECTION

Date: 30-AUG-2023

3.125(d)

Facilities, general.

There was a 30 gallon trash can without a lid that was half full of animal waste and trash located in the building that contained the indoor portions of the enclosures for the servals, lynx, and caracals. There was an extremely strong and foul odor coming from the trash can that could be smelled throughout the building. There were also flies on the waste material. Improper waste disposal can result in odor, vermin infestation, and disease hazards. The licensee must ensure that animal waste, food waste, bedding, dead animals, and trash are collected and disposed of in a proper and timely manner.

To be corrected by September 1, 2023.

3.153(c)

Primary enclosures.

The enclosure for two adult mute swans had a water tub that was about 7 feet long and 3 feet wide. One swan was in the tub and could only swim in small circles in the area provided. There was not enough room for both birds to make normal postural and social adjustments such as immersion, bathing, foraging, and swimming with adequate freedom of movement for their well-being. The licensee must ensure that aquatic and wading birds have access to water with sufficient surface area and depth.

To be corrected by September 7, 2023.

3.154

Environment enhancement to promote psychological well-being.

An environmental enhancement plan for birds could not be produced for the inspectors at the time of the inspection. This plan is necessary to promote the psychological well-being of birds. The licensee must develop, document, and follow a species-appropriate plan that has been approved by the attending veterinarian. The plan must be in accordance with AWA regulations and with currently accepted professional standards as cited in appropriate professional journals or reference guides.

To be corrected by September 7, 2023.

3.158(d)

Inspection Report

Cleaning, sanitization, housekeeping, and pest control.

The parakeet building had at least 7 mice coming out of the walls, running around on the floor, and running around the feet of people. One mouse was observed to drink out of the parakeets' water receptacle. Mice can contaminate bird food and water and can harbor diseases that affect the health and well-being of birds and people. The licensee must develop a safe and effective program for the control of insects, avian pests, and mammalian pests in and around bird enclosures. To be corrected by September 7, 2023.

Prepared By: KONS	ΓANZE PLUMLEE	USDA, APHIS, Animal Care	Date: 30-AUG-2023
ALICIA GRAVES, ANIMAL CA	RE INSPECTOR		
Additional Inspectors:			
This inspection and exit intervi	ew were conducted with a f	acility representative.	
To be corrected by September	7, 2023.		
safe and effective program for	the control of insects, avian		in and around bird enclosures.
