Certificate: 32-A-0935

Site: 001

Daniel T Fisher

Type: ROUTINE INSPECTION

Date: 01-NOV-2022

2.75(b)(1)

Records: Dealers and exhibitors.

The records are incomplete. Counts of animals on hand, born, and euthanized are not recorded. Complete and accurate records give an overview of animal health, and are needed to evaluate and achieve optimal animal welfare. Licensee shall make, keep, and maintain records which correctly disclose animals on hand, and those which are born, transported, sold, euthanized, or otherwise disposed of by licensee. Correct by November 15, 2022

3.31(a)(1)

Sanitation.

Some of the enclosures are too dirty. Wet shavings, moisture and fecal material has collected at the end of some of the enclosures near the lixits. The Guinea pigs must go into the dirty area to drink water, exposing the animals to disease hazards. Primary enclosures shall be cleaned and sanitized often enough to prevent an accumulation of excreta or debris. They also must be sanitized at least once every 2 weeks in an approved manner. Correct by November 15, 2022

This inspection and exit interview were conducted with Licensee.
