# ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\* Five plastic containers containing various liquids were not labeled appropriately. These medications were intermingled with other products that are currently being used at the facility and are therefore ready for use. Medications must be labeled with appropriate and accurate information in order to ensure that the contents of the container can be known with certainty, that the drugs are used at safe doses and medications are not used past their expiration dates. As part of the program of adequate veterinary care, the licensee must consult with the attending veterinarian and ensure that all medications at the facility are labeled with the names of the medications, the dosage instructions and expiration dates. The licensee must also ensure that the veterinarian has approved the use of any medications that have not been approved for use in dogs to ensure that proper dosing and administration is accomplished.

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

The following dogs are in need of veterinary attention:

\* Two white adult female Maltase's (microchip number 049 310 608 and 031 112 538) and one red colored adult male Dachshund (microchip number 143963765A) have an accumulation of dark brown material coating the entire surface of the upper cheek teeth. There was a creamy white discharge along the gum line. The gum line is red and swollen and has receded away from the upper cheek teeth. These signs are consistent with the presence of dental disease which can impact the ability of the dog to eat, affecting the health and well-being of the dog. Dental disease can be painful, lead to a decrease in appetite and infection in the mouth. The licensee must have these animals examined by a veterinarian by the end of business 1/15/15 and appropriate treatment plan administrated. The outcome of this examination must be documented and provided to the inspector upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

## 3.1(a)

#### HOUSING FACILITIES, GENERAL.

\* An estimated three inch wide by six inch high gap was observed in the enclosure fencing. One dog is in contact with the affected area located along the bottom on the left side of one outdoor enclosure gate. The potential for

injury exists if the dog gets caught in the gap area. The licensee must ensure all enclosures are kept in good repair, protect the animals from injury and contain the animals securely at all times. Correct by 1/26/15.

## 3.1(c)(3)

## HOUSING FACILITIES, GENERAL.

\* There is a mixture of dirt, grease and other excreta accumulating on the metal pipe frame and chain link fencing in one enclosure. One dog is in contact with the affected area located in outdoor housing. The affected area covers approximately 20 to 30 percent of the pipe frame and fencing. Cleaning and sanitization of surfaces that are in contact with dogs are necessary to prevent an accumulation of excreta and reduce disease hazards. Unsanitary living conditions and potential transmission of diseases exists when surfaces are not cleaned and sanitized. The licensee must ensure that all surfaces are spot cleaned on a daily basis and sanitized in accordance with Sec. 3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards. Correct by 1/26/15.

## 3.11(a)

## CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

- \* Two outdoor enclosures containing four dogs have dried, caked fecal residue on 50 to 75 percent of the cement flooring. It indicates an unsanitary living condition exists and could lead to potential disease or health risks. Increased animal, food or fecal waste buildup reduces available clean surface area that the dogs have access to. The potential for soiling or caking of the hair coat exists when the dogs have to walk or rest on the affected surfaces. The licensee must ensure that all surfaces are cleaned and sanitized on a daily basis. Correct by 1/13/15.
- \* The facility inspection and exit briefing done on 1/12/15 were conducted with the licensee.
