SOUTHERN TIER ZOOLOGICAL SOCIETY INC

**ROUTINE INSPECTION** Type:

Date: 25-AUG-2016

## 3.56(b)(1)

#### SANITATION.

\*\*\* The rabbits in the contact area are housed directly on concrete in a stall during the warmer months. The concrete is no longer sealed and impervious to moisture. This does not allow the enclosure to be effectively cleaned and sanitized every 30 days as required. The floor should be made impervious to moisture to facilitate cleaning of these enclosures.

Correct by: Sept 25, 2016

This inspection and exit interview were conducted with animal curator at the time of the inspection.
