TROY & JODY GRANT

Type: ROUTINE INSPECTION

Date: 31-JAN-2018

3.127(d)

FACILITIES, OUTDOOR.

There were 16 enclosures housing 3 opossums, 6 skunks, and 13 woodchucks located in a building that regularly has double sliding doors in the open position creating an outdoor facility requiring a perimeter fence. The doors were open at the time of the inspection and no perimeter fence was present around the building.

A perimeter fence is required around these animals in order to protect them from unauthorized persons and other animals and to provide for a secondary containment system. All outdoor facilities housing regulated animals must be enclosed by a perimeter fence. It must be of sufficient distance (3 feet or more) from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside of the perimeter fence and can function as a secondary containment system for the animals in the facility.

TO BE CORRECTED BY: February 14, 2018

This inspection and exit interview were conducted with a licensee and ACI Bartels.
