Site: 001

Puppy Love Relocating

Type: ROUTINE INSPECTION

Date: 30-OCT-2023

2.134(a)

Contingency planning.

A developed contingency plan was not available at time of inspection. Contingency plans help prepare registrants on how to provide humane handling of animals during emergent events. The registrant must develop a complete contingency plan tailored to the conveyance, business operations and species of animals transported.

Correct by 30 November 2023.

3.15(a)(6)

Primary enclosures used to transport live dogs and cats.

Primary enclosures used for transport of dogs and cats that were not permanently affixed to the conveyance were not marked with the words "Live Animals" in letters at least 1 inch high and with arrows indicating the correct upright position. Failure to mark primary enclosures used in transport with these words may result in delayed response in the event of an emergency or improper care of animals when handling. Registrants must clearly mark primary enclosures on the top and on one or more sides with the words "Live Animals" in letters at least 1 inch high and with arrows or other markings indicating the correct upright position of the primary enclosure.

Correct from this date forward of 30 October 2023.

This inspection and exit interview were conducted with facility representatives.
