Andy A Yoder
2169 County Road 70
Sugarcreek, OH 44681

Customer ID: **329521**

Certificate: **31-A-0526**

Site: 001

ANDY A YODER

Type: ROUTINE INSPECTION

Date: 22-SEP-2016

3.6(a)(2)(i)

PRIMARY ENCLOSURES.

The wire ties, used to support the white board, in each of the whelping box areas are long and are pointing in toward the enclosure. These wires create the potential for the female and her puppies to be injured. The primary enclosures must be constructed in a way as to have no sharp points or edges that could injure the dogs. Correct by replacing or repairing these wire ties to remove the sharp point from the enclosures.

Correct by: October 6, 2016

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Flies were found in multiple areas in the dog housing area. The flies were worst in the whelping areas and covered several PVC pipes above the enclosures. Efforts have been made to reduce the number of flies gaining entry into the dog areas, including the use of screens. Pests and their feces can serve as a source of infection for the dogs in the kennel. Correct by establishing a pest control program that effectively controls all pests, including flies, and prevents contamination of the environment by pests and their feces.

Correct by: October 22, 2016

This inspection and exit interview were conducted with Licensee's wife.
