Jungle Exotics

Type: ROUTINE INSPECTION
Date: 07-APR-2026

3.131(d)

Sanitation.

Numerous flies were present in the outdoor food preparation area and near the entrance to an indoor food storage building. Fly traps were present; however, they were not efficiently removing unwanted flies. Flies or other pests may contaminate the animal food supplies and potentially spread disease. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests must be established and maintained.

Correct by 04/21/2026.

This inspection and exit interview were conducted with a facility representative.
