Type: ROUTINE INSPECTION
Date: 03-APR-2026

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

During inspection, APHIS Officials asked the facility representative on several occasions if flea preventives had been applied to the coatimundis. The facility representative stated that they had not treated the coatimundis with flea preventative. APHIS Officials contacted the Attending Veterinarian (AV) and discussed the medical notes. The AV stated the guidance given was to place all coatimundis on Revolution Plus. Furthermore, per the medical records, the AV recommended Revolution Plus for all coatimundis as a flea preventative, but the facility has not provided that treatment. The licensee, in conjunction with a veterinarian, must use appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and must determine the availability of emergency, weekend, and holiday care.

Correct by April 17, 2026.

This inspection and exit interview were conducted with Facility Representative.
