

Inspection Report

City of Manhattan-Sunset Zoo
2333 Oak Street
Manhattan, KS 66502

Customer ID: **4086**
Certificate: **48-C-0012**
Site: 001
City of Manhattan

Type: ROUTINE INSPECTION
Date: 09-APR-2026

2.131(c)(1)

Handling of animals.

The prairie dog enclosure (housing at least 4 prairie dogs) and the pond birds enclosure (housing 2 pelicans, 1 Canadian goose, and 2 crested screamers) do not have a public barrier. The primary enclosure fencing is only about waist high and is constructed of wooden framing and mesh. The facility representative stated that she and the keepers have seen visitors reaching over the fence and trying to touch the animals and have had to intervene to stop the interaction. Direct contact from the public could cause injury to the animals as well as increase the risk of a transfer of zoonotic diseases.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public. The facility must install a compliant public barrier around the prairie dog and pond bird enclosures to eliminate the risk of the public making direct contact with the animals.

Correction date: June 08, 2026

This inspection and exit interview were conducted with the facility representatives.
