3400 Vine St
Cincinnati, OH 45220

Customer ID: **2208**

Certificate: **31-C-0044**

Site: 001

ZOOLOGICAL SOCIETY OF
CINCINNATI

Type: ROUTINE INSPECTION

Date: 18-MAY-2026

3.127(d)

Facilities, outdoor.

The facility has sections of the perimeter fence that do not meet the requirements:

- On the south side of the facility, the fencing used at the main gate measures approximately 83 inches (6 feet 11 inches). There is a gap above the fence that measures approximately 14 inches.
- On the east side of the facility, there is a section of perimeter fence adjacent to the cheetah van (Gate 7) where the fence measures approximately 90 inches (7 feet 6 inches).
- On the south side of the facility behind the old elephant exhibit, there are two gates in the perimeter fence that remain open during operating hours and are not maintained with an attendant.

Failure to provide an appropriate perimeter fence may result in animal escape or allow persons or other animals to interact with the regulated animals. All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized person out. Fences less than 8 feet high (96 inches) for potentially dangerous animals, such as but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.), bears, wolves, rhinoceros, and elephants, or less than 6 feet high for other animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved in writing by the Administrator. Correct by ensuring that all species requiring a perimeter fence are completely enclosed within an adequate perimeter fence that meets all requirements. Alternatively, a variance may be requested in writing and sent to the APHIS Administrator. Correct by 18-AUG-2026.

This inspection and exit interview were conducted with Facility Representatives.
