Type: FOCUSED INSPECTION

Date: 13-MAY-2026

2.31(c)(1)

Institutional Animal Care and Use Committee (IACUC).

A significant change to an ongoing IACUC approved protocol was implemented by investigator staff without prior review and approval of the IACUC. One (1) Rafinesque's big-eared bat was captured under Protocol 2253 (a catch and release protocol) on July 12, 2025, and was subsequently euthanized following discovery of a compound fracture of the forearm. The method of euthanasia was not included on the IACUC approved protocol, nor was the individual listed as approved to perform euthanasia on the IACUC approved protocol.

This activity constitutes a significant deviation from the approved activities in the protocol. Making significant changes to protocols without IACUC review and approval deprives the IACUC of the opportunity to provide oversight of animal activities and compliance with the Animal Welfare Act.

The IACUC is responsible for approving all proposed activities or proposed significant changes to ensure that the activities related to the care and use of animals are in accordance with the Animal Welfare Act. The IACUC shall review and approve, require modifications in, or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities.

This incident was identified by the research facility as a protocol deviation and corrective measures were implemented prior to this inspection.

This inspection and exit interview were conducted with facility representatives.
