Type: ROUTINE INSPECTION
Date: 09-APR-2026

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility has not adequately communicated with the attending veterinarian to provide information regarding the progressing locomotion difficulties of two, approximately seven-year-old, white lions. At the time of inspection, the lions were observed having trouble standing and walking. The lions were observed to be extremely weak, trembling in the legs, staggering when walking, and are occasionally collapsing to the ground. The facility makes daily observations but had not contacted the attending veterinarian regarding the progression of the symptoms. The attending veterinarian confirmed that he had last been at the facility in the fall of 2025. The attending veterinarian stated that at the time of his last visit the lions did not exhibit the symptoms observed at the time of inspection. The attending veterinarian has not been contacted since his last visit to evaluate the health of the two lions.

Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include: Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian

To be corrected by noon on 4-10-2026, local time.

This inspection and exit interview were conducted with the licensee.
