3.56(a)(1)

Sanitation.

A rabbit enclosure housing a single rabbit contains an excessive buildup of feces. In one corner, a mound of excreta approximately five inches high has accumulated above the wire mesh flooring.

Failure to remove accumulations of excreta pose significant health risks by promoting the spread of disease, producing strong and unpleasant odors, and attracting pests.

Primary enclosures for rabbits shall be kept reasonably free of excreta, hair, cobwebs, and other debris by periodic cleaning. Correct this day, April 7, 2026, forward.

This inspection and exit interview were conducted with the facility representative.
