Type: RE-LICENSE INSPECTION

Date: 13-APR-2026

3.152(b)

Facilities, outdoor

There is inadequate shelter available to protect the ducks and geese against inclement weather. Two geese and one duck had wet and muddied feathers. The only option to remain dry was one dog igloo that had a solid bottom. Their outdoor housing facility has a floor made of dirt which was all moistened from the recent rain. Located on the left half of the enclosure is a black mesh cover that does not inhibit precipitation from entering the enclosure. For shelter the enclosure contains two dog igloos which does not provide effective protection for all 12 ducks and 5 geese.

Outdoor housing facilities must provide adequate shelter for the local climatic conditions to protect the birds from any adverse weather condition. Shelters must provide one or more separate areas of shade or other effective protection that is large enough to comfortably contain all the birds at one time and prevent their discomfort from direct sunlight, precipitation, or wind.

This is the 2nd Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 1 more inspection or by June 5, 2026 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
