Type: ROUTINE INSPECTION
Date: 23-JUN-2026

2.75(b)(1)

Records: Dealers and exhibitors.

The licensee does not have acquisition records for one adult sulfur-crested cockatoo, three adult budgies, two adult degu, three adult guinea pigs, one domestic ferret and one hedgehog.

Records containing the required information for animals disposed of, or acquired for, use in regulated activities (including those offspring born on premises) are necessary to accurately track animals to ensure their humane care and use. The licensee must make and maintain records of the inventory, acquisition and disposition of all animals which fully and correctly disclose the required information; these records must be furnished within a reasonable amount of time and as may be specified in the request for information.

TO BE CORRECTED FROM 07/08/2026 AND GOING FORWARD

3.154

Environment enhancement to promote psychological well-being.

At the time of inspection, the facility could not produce a completed environmental enhancement plan for avian species approved by the Attending Veterinarian. The partial plan does not contain adequate descriptions for how the facility approaches social grouping, environmental enrichment, special considerations, restraint devices and exemptions related to environmental enhancement for birds. The attending veterinarian has not seen the partial plan.

The Environment Enhancement Plan is required to promote psychological well-being of the avian species at the facility. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and, at a minimum, must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan.

TO BE CORRECTED BY 07/17/2026

3.158(a)(1)

Cleaning, sanitization, housekeeping, and pest control.

The enclosure housing an adult male sulfur-crested cockatoo named "Sunny" has an accumulation of urates on the floor and on enrichment items inside the enclosure.

Accumulations of excreta and other material are porous and can harbor microorganisms that could cause animal illness. The licensee must ensure that excreta and food waste is removed from primary enclosures and from under and around
