

Inspection Report

Audubon Nature Institute
6500 Magazine Street
New Orleans, LA 70118

Customer ID: **4767**

Certificate: **72-C-0141**

Site: 001

Audubon Nature Institute

Type: ROUTINE INSPECTION

Date: 07-JUL-2026

3.84(d)

Cleaning, sanitization, housekeeping, and pest control.

Rodent feces were observed in the indoor portion of the building housing the Golden Lion Tamarins and Mandrills. The feces were observed throughout the keeper side of the building including under the non-human primate's toys. Rodent feces were also observed on the keeper side of the building housing the Capuchins. The facility stated that they are actively trapping pests, however, their current program does not appear to be effective in these animal areas. Failure to maintain an effective program to control mammalian pests can have a negative impact on the health of the animals through the spread of disease or contamination of animal areas and feed. The licensee must correct by implementing an effective pest control program in all animal areas.

Correct by : August 7, 2026

This inspection and exit interview were conducted with a facility representative.
