Type: RE-LICENSE INSPECTION

Date: 24-MAR-2026

3.154(c)(2)

Environment enhancement to promote psychological well-being.

The licensee is not following their plan for bird environment enhancement. Their plan states that birds with feather plucking, a sign of psychological distress, will be isolated from the flock. One white female chicken that has a moderate amount of feather loss along her left wing and back has not been isolated from the flock. The licensee stated that they have noticed that she tends to pluck her own feathers.

It is important to give special attention to birds that show any signs of psychological distress to provide adequate care, alleviate any suffering, and promote welfare. Not following an environment enhancement plan for special attention for birds with psychological distress can lead to prolonged distress for the animal. Dealers and exhibitors must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds including special attention for birds showing signs of psychological distress through behavior or appearance.

3.158(a)(1)

Cleaning, sanitization, housekeeping, and pest control.

A dog kennel that is being used inside the chicken enclosure has a buildup of excreta. The chickens use this kennel as shelter and for perching. Located above the kennel is the accumulation of old and new bird excreta. Bird excreta has fallen onto the kennels left side as indicated by dark brown layers of dirt and old excreta along the wall. This excrement is dark in color and has formed a round mass above the projecting rim.

An accumulation of feces can increase the risk of disease, pests, and odors. The facility must remove excreta and food waste from the primary enclosure as often as necessary to prevent excessive accumulation of feces and food waste, to prevent soiling of the birds contained in the primary enclosures, and to reduce disease hazards, insects, pests, and odors.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.
