Denver, CO 80205

Customer ID: **3493**

Certificate: **84-C-0002**

Site: 001

Denver Zoological Foundation

Type: ROUTINE INSPECTION

Date: 16-JUN-2026

2.40(b)(2) Critical

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Two tapirs died of an accidental overdose of a copper supplement. On January 7, 2026, a male 16-year-old tapir named "JohHi" was found dead after an acute onset of blood in the urine. Three days later a female 18-year-old tapir named "Rinny" also developed blood in the urine and emergency treatment was implemented by the veterinary team. Her condition continued to decline, and she was euthanized on January 10, 2026. Cause of death was determined to be an incorrect dosage of copper supplementation despite repeated blood serum copper values being below normal. The incorrect dosage led to fatal copper poisoning. Improper calculation of feed additives can lead to animal illness, disease, and death.

The facility must use appropriate methods to prevent, control, diagnose, and treat disease and injury.

The facility implemented immediate corrective actions to strengthen safety protocols so there is better oversight of the supplement administration process before the inspection on June 16, 2026.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

KATHRYN VERNON, ANIMAL CARE INSPECTOR

Prepared By: MARY ANN ARCHER

USDA, APHIS, Animal Care
