Type: ROUTINE INSPECTION

Date: 02-JUN-2026

3.80(a)(1)

Primary enclosures.

Several of the metal ceiling beams in the off-exhibit nonhuman primate enclosures have flaking paint and rust. The areas of rust range in size from a few inches to feet in length.

Failure to maintain primary enclosures can lead to loose paint, rust, or exposed surfaces which can allow for ingestion of foreign materials and make cleaning difficult.

Primary enclosures must be constructed of suitable materials and kept in good repair to ensure the health of the animals. Correct by: 07/20/2026.

This inspection and exit interview were conducted with facility representatives.
