A & H Farm
1374 Collins Lane
Manhattan, KS 66502

Customer ID: **6020555**
Certificate: **48-C-0187**
Site: 001
A & H Farm

Type: ROUTINE INSPECTION
Date: 03-MAR-2026

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

One black and white pig has a large area of hairloss along its back from the shoulder blades to the rump. The skin in this area is thickened, cracked and flaking. Several areas of reddened skin are located throughout the affected area of the back. The facility is aware of the pig's condition but has not contacted the attending veterinarian and no treatment has been provided.

Hair loss and cracked and reddened skin could indicate a serious underlying health issue which could cause pain and discomfort to the pig and could worsen without intervention.

Each dealer and exhibitor must ensure that there is direct and frequent communication with the attending veterinarian so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed. The licensee must have this pig evaluated by the attending veterinarian for an accurate diagnosis and to develop an effective treatment plan. The licensee must ensure that all veterinary care concerns are communicated to the attending veterinarian as quickly as possible.

Correction date: Licensee spoke to the attending veterinarian at the time of the inspection concerning the pig's condition.

3.125(d)

Facilities, general.

In the large pig enclosure, housing at least 24 pigs, there is a section of metal fencing lying on the ground. Additionally, there are pieces of plastic also scattered on the ground around the pigs' wooden shelter. Debris and trash in the enclosure could cause injury to the animals should they come into contact with it or consume it.

Provisions shall be made for the removal and disposal of animal and food wastes, bedding, dead animals, trash and debris. The licensee must remove the metal fence and the pieces of plastic from the pig enclosures. The licensee must also ensure that all animal enclosures remain free of trash and debris at all times.

Correction date: March 09, 2026
