Type: ROUTINE INSPECTION

Date: 12-AUG-2026

3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

Multiple enclosures had fecal material that was turning green, indicating mold growth. When asked the licensee stated it had been a couple of days since the enclosures were last scooped. Not removing excreta waste from the enclosures on a daily basis can contribute to the spread of disease. All enclosures must have fecal material removed from the enclosures on a daily basis. Correct starting on 8/12/26.

This inspection and exit interview were conducted with the licensee.

End of report.
