Certificate: **74-C-1155**
Site: 001
Mystic Misfits

Type: ROUTINE INSPECTION
Date: 12-AUG-2026

3.84(d)

Cleaning, sanitization, housekeeping, and pest control.

In the primary enclosure housing 2 Bonnet macaques, 1 pigtail macaque, and 1 crab-eating macaque, numerous rats were observed on the ground and running along the metal beams and mesh wiring of the enclosure about six feet up on the east wall of the enclosure.

The presence of rats is a potential disease hazard to the animals. Rodents can carry diseases and parasites which can spread to the primates in the enclosure.

An effective program for control of insects, external parasites, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.

To be corrected by August 31, 2026.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

Ronald Richardson, VETERINARY MEDICAL OFFICER
