3.13(a)(3)

Veterinary care for dogs.

The written Program of Veterinary Care (PVC) is not complete and does not include a schedule for sampling for parasites and other pests (including fleas, worms, coccidia, giardia, and heartworm). Failure to have a schedule for parasite sampling may cause the animals to not be adequately protected from parasites.

The written program of veterinary care must address the requirements for adequate veterinary care and must include vaccinations for contagious and/or deadly diseases of dogs (including rabies, parvovirus, and distemper) and sampling and treatment of parasites and other pests (including fleas, worms, coccidia, giardia, and heartworm) in accordance with a schedule approved by the attending veterinarian. Correct by having the Attending Veterinarian update and approve the written program of veterinary care with all the required information. Correct by 8-SEP-2026.

This inspection and exit interview were conducted with a Facility Representative.
