Type: ROUTINE INSPECTION
Date: 18-AUG-2026

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

APHIS officials observed two small active wasp nests (less than ~3 inches) in the ceiling of a coop housing 10 chickens and 1 goose. Pests, such as wasps, can negatively impact the health of the birds. The facility must ensure that a safe and effective program for the control of pests is established and maintained to promote the health and well-being of the birds. To be corrected by September 1, 2026.

This inspection and exit interview were conducted with facility representatives.
